CAPSTONE-I PROJECT REPORT

Design and Development of the CSE Department Website of Indian Institute of Technology Patna

Hybrid UG Program in Computer Science & Data Analytics

Student Name: Abhishek Kumar Mishra
Roll No.: US2604CDH35
Group No.: 27 **Topic No.:** 47

INDIAN INSTITUTE OF TECHNOLOGY PATNA · BIHTA – 801106, INDIA · 4 November 2026

Declaration & Project Aim

Declaration

I hereby declare that this report describes the work carried out by me as part of the collaborative Capstone-I project titled “Design and Development of the CSE Department Website of Indian Institute of Technology Patna.” The project work was divided among four group members. This report identifies my individual contribution and acknowledges the work assigned to the other members of the group. It describes the frontend of the department website using HTML, CSS, and JavaScript.
Date: 4 November 2026 · Group No.: 27

Project Aim

Design and develop a website for the CSE Department of IIT Patna that brings important departmental information together in a structured format, so students, faculty, visitors and other stakeholders can access it easily.
Sections: Homepage, About Department, Academics, Faculty & Research, and Students, Events & Contact.
Built with HTML5, CSS3 and JavaScript in Visual Studio Code.

Project Progress

My part – Homepage, About Department and Academics – has been developed.

Component	Status	Details
About Department page	**Completed**	About the department, Vision & Mission, labs and achievements – Abhishek Kumar Mishra
Academics page	**Completed**	Programmes, courses/curriculum, FAQ accordion, expandable sections – Abhishek Kumar Mishra
Homepage	**Completed**	Landing page with banner slider – Abhishek Kumar Mishra
Planning, navigation bar and Events pages	**Completed**	Developed by Ashish Kr Pandey
People and Research pages	**Completed**	Developed by Anuj Kr Patel
Hosting and Git/GitHub work	**Completed**	Handled by Shubham Kr Pandey
Integration and testing	**Completed**	All sections to be joined and tested before final submission

Group Members & Roles

Abhishek Kumar Mishra · US2604CDH35

Homepage, About Department & Academics
Homepage landing page, Vision & Mission, programmes, curriculum, labs, achievements, FAQ accordion.
index.html, pages/about.html, pages/academic.html

Ashish Kr Pandey · US2603CDH20

Planning, Navigation Bar & Events
Website structure planning, common navigation bar used on every page, Upcoming and Past Events pages.
pages/upcoming-events.html, pages/past-events.html, assets/css/events.css

Anuj Kr Patel · US2603CDH17

People & Research
Faculty, staff and student profiles, research areas, labs and publications.
pages/people.html, pages/research.html

Shubham Kr Pandey · US2604AIH40

Hosting & Git/GitHub
GitHub repository setup, merging team code, fixing image and file paths, GitHub Pages hosting.
capstone-project-team-27: index.html, pages/, assets/

Work Done by Me

Abhishek Kumar Mishra (US2604CDH35), Group No.: 27

I took part in planning the website and worked on the About Department and Academics sections, presenting the department's identity and academic structure clearly. I used shared styling conventions so my pages plug into the common navigation bar and footer built by my teammate.

Work done till now

- Built the About Department page: introduction, Vision & Mission, labs and achievements
- Built the Academics page: programmes, courses and curriculum
- Added an interactive FAQ accordion
- Added expandable sections so long content stays compact
- HTML5 structure, CSS3 styling, JavaScript interaction

Tools used

- HTML5
- CSS3
- JavaScript
- Visual Studio Code
- Git / GitHub

Chapter 1 · Introduction

1.1 Project Overview

A department website is a central point of information. This frontend site uses a structured layout and clear navigation; sections are joined by a common navigation bar.

1.2 Problem Statement

Profile, programmes, courses, faculty, research and events are spread over different places. One organised site with clearly named sections solves this.

1.3 Objectives

- User-friendly online platform for CSE, IIT Patna
- Organise information into meaningful sections
- Clear Vision & Mission, programmes, curriculum
- FAQ accordion and expandable sections

1.4 Scope and Limitations

Scope: frontend website with Homepage, About, Academics, Faculty & Research, Students, Events & Contact.
Limitation: no backend, so content lives in frontend code; responsiveness, accessibility and content management still to improve.

Chapter 2 · System Design

HTML5
Structure
Content and elements of every section

CSS3
Presentation
Appearance, layout and visual presentation

JavaScript
Behaviour
FAQ accordion, expandable sections, client-side features

All pages share the same navigation bar, footer and common styling. Tools: Visual Studio Code and Git / GitHub. No database in this phase – one HTML page per section.

Module	Description
Homepage	Hero, introduction, announcements, quick links, events preview
Navigation	Responsive navbar, mobile menu and footer shared by every page
About Department	Department information, Vision & Mission, labs, achievements
Academics	Programmes, curriculum, FAQ accordion, expandable sections
Faculty & Research	Faculty directory with search/filters, research areas, publications
Students, Events & Contact	Activities, event filters, contact form with validation

Chapter 3 · Program Flow

1. Understand requirements and identify sections
2. Plan website structure and navigation
3. Create page structure using HTML5
4. Apply styling and layout using CSS3
5. Add client-side interaction using JavaScript
6. Review and integrate team members' work
7. Test navigation, layout and interactive elements

Frontend: About Department (about.html) and Academics (academics.html, js/academics.js) are my deliverables.

Source Code (Simplified)

HTML

```
<section class="faq">
  <h2>Frequently Asked Questions</h2>
  <div class="faq-item">
    <button class="faq-question">Which programmes does the department offer?</button>
    <div class="faq-answer">B.Tech, M.Tech and Ph.D. programmes.</div>
  </div>
</section>
```

JavaScript (js/academics.js)

```
document.querySelectorAll('.faq-question').forEach(function (btn) {
  btn.addEventListener('click', function () {
    var answer = btn.nextElementSibling;
    btn.classList.toggle('open');
    answer.style.display = btn.classList.contains('open') ? 'block' : 'none';
  });
});
```

GitHub: https://github.com/AICyberShubham/capstone-project-team-27.git

Chapter 4 · Conclusion & Future Work

Conclusion

The project provides an organised frontend platform for departmental information, built with HTML5, CSS3 and JavaScript in VS Code.
My contribution: the About Department and Academics sections – Vision & Mission, programmes, curriculum, labs, achievements, FAQ accordion and expandable sections.
Teamwork showed why shared styling and a common navbar keep sections consistent.

Future Work

- Backend to manage content dynamically
- Additional sections based on student and department needs
- Better responsiveness, accessibility, content management and UX
- Test links, pages, FAQ accordion and layouts on the final integrated version

Thank You

Abhishek Kumar Mishra · US2604CDH35 · Group 27
